

# OFFSITE BACKUP SERVICE

SOLUTIONS BY ALPHA TECHNOLOGIES

## Not backing up your Windows Servers opens the door to liabilities and huge losses in revenue and reputation.

You can schedule your backups to run daily, weekly, or monthly, or as frequently as every two hours for near continuous backup. Stop wasting time and money with external hard drives, stacks of CDs, and traditional tape backup systems. Alpha will download and install the application, then select the files you want to back up. No capital expenditure for hardware required, very little upfront cost, and minimal administrative overhead to maintain.

After the initial primary backup, only the data that has changed is backed up incrementally, saving time, resources and bandwidth. The files that you select to be backed up are the files that are backed up off site. The data that you have on your system, is the exact same data that is remotely backed up. It is important for you to ensure that the files that you are transmitting off site are clean, accurate and not corrupted. If your data is corrupted, that's the same data that is being backed up off site. For an additional charge, Alpha can provide an additional weekly service to validate that your data is not corrupted. A weekly integrity check of your original data can be completed for \$10 per occurrence/per server.

## Prices are calculated based on the amount of data being backed up per server: 12 month contract.

One time setup fee per server: \$250. Prices will automatically change if your backup space goes from one category to the next. The following pricing is on a per month basis. **Each Server requires its own agreement.**

0-10 Gigabyte	\$40 per month
10-20 Gigabytes	\$60 per month
20-80 Gigabytes	\$80 per month
80+ Gigabytes	\$1 per Gigabyte

Annual License per server	\$125
Annual License per server	\$125
Annual License per server	\$125
Annual License per server	\$125
