The IT landscape is changing at a rapid pace and is becoming more and more dependent on reliable, “state of the art” data center services. Federal CIO’s, IT Directors and Corporate IT professionals are facing budget constraints, staffing shortages and overall downsizing requirements. All of these aforementioned situations could impact their ability to meet their stringent service delivery responsibilities. Alpha Technologies provides Executive level leadership and IT experts that can assist with or perform mission critical service level processing requirements at our “state of the art” DC1 Location. Alpha Technologies can provide a wide range of Information Technology and data center services and meet customer expectations and Service Level Agreements. The Federal and Corporate IT landscape today has many CIO’s and Executives focused on reducing overall IT costs and complexities moving more to an OPEX vs. CAPEX operational budget. Many IT professionals are examining transformational infrastructural moves into Cloud operational environments as well to cut costs and provide better customer service. In any of these approaches it has been proven to be easier said than done. Alpha Technologies provides expert support in any of these areas for clients facing shrinking Information Technology budgets and increased pressure on IT organizations to reduce costs, improve business value, and perform at a continuous high level. Alpha Technologies is ready to assist its Federal and Corporate clients with:

1. Developing data center consolidation/migration plan strategies
2. All aspects of Disaster Recovery and COOP planning activities
3. Cloud Migration planning and strategies
4. Operational Efficiency reviews

5. Transformational solutions to more effective operations
6. Assist with reducing overall IT costs and complexities
7. Managed operational, NOC and SOC Services
8. Business Process re-engineering
9. Designing and implementing enterprise architectures
10. Help agencies to co-locate tier infrastructure components into Alpha's DC1

Data Center consolidation and recognizing and implementing operational efficiencies can be difficult. Alpha Technologies with its leadership team and team of IT experts is ready to assist Federal CIO's and IT executives and Corporate IT staffs move to the next level by hosting their computer processing needs in our DC1 facility. Let Alpha be your Service Provider and assume your customer service processing burden.

ABOUT THE AUTHOR

Rick Ware is a leading expert in data center management. He currently is the Senior VP of Government Solutions and Consulting for **Alpha Technologies**, a World Class IT SDVOSB located in Charleston West Virginia. Rick has held Executive Leadership positions with Unisys Corporation and Capgemini, two large Global IT firms. Prior to that, Rick retired from the Internal Revenue Service where he was a member of the IRS Senior Executive Service. While at the IRS, Rick had Senior Executive Leadership and managerial responsibilities for all IRS Data Centers-a significant responsibility given the fact the entire tax administration process relies on the effective operations of the IRS Data Centers. Rick has over 39 years of IT experience.
